Warnings and Precautions

⚡

This symbol, located on back or bottom of the unit, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

⚠

This symbol, located on back or bottom of the unit, is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

To reduce the risk of electric shock, do not remove cover (or back). There are no user-serviceable parts inside. Please refer any servicing to qualified service personnel.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

WARNING: To prevent fire or shock hazards, do not expose this unit to rain or moisture.

WARNING: Danger of explosion if the unit's batteries are incorrectly installed. Replace only with the same or equivalent battery.

Do not mix old and new batteries.
Do not mix alkaline, standard (carbon-zinc), or rechargeable (ni-cad, ni-mh, etc) batteries.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Powering the Unit

The unit is powered by loading two AAA batteries (not included) into the battery compartment.

Please note, when powered on, the unit can last approximately 6 hours off of two AAA batteries.

In the Box

• PF118
• USB Cable
• File Conversion / Compression Software CD

Features

Digital Photo Frame displays photos and pictures

• JPEG/BMP/GIF Picture File Format
• Delete Function

1.5" Color Display

• 128 x 128 Pixel, 65K Color

Supports USB Sync

• Supports Multiple Picture Download at one time from PC through Conversion Program

Digital Clock and Calendar

Auto Power Off Interval Selection (None, 3, 5 , 10, 15, 30, 45, 60 Minutes)

• Auto On/Off Times

Installed Flash Memory

• Can Store up to 180 pictures

DC-Powered:

• Uses 2 x "AAA" Batteries, (not included)
